

KENAN EGE

Warsaw, Poland | +90 541 302 5464 | kenanegee@gmail.com | kenanege.com | linkedin.com/in/kenanege
| github.com/KenanAegean

Technical Skills

- **Programming Languages:** C++, C#, Python, Java, JavaScript, HTML5, CSS3
- **Game Engines:** Unity (2D/3D), Unreal Engine 5 (Blueprints, C++)
- **Frameworks/Libraries:** Django, Bootstrap, Unity UI Toolkit
- **Tools:** Git, GitHub, Perforce, Docker, Rider, VS Code, Jira, Inno Setup
- **DevOps:** CI/CD pipelines, GitHub Actions, Docker
- **Game Programming:** AI State Machines, Behavior Trees, ScriptableObjects, Level Design Tools
- **Language:** English (Fluent), Turkish (Native)

Projects

kenanege.com — HTML, CSS, JavaScript, GitHub Actions

Sep 2024

- Built an 8-page modular static site with HTML5 partials for easy maintenance.
- Implemented a responsive design with CSS Flexbox/Grid and vanilla JavaScript.
- Automated repo sync and FTP deployment via GitHub Actions.
- Link: kenanege.com

Echoes Of Stella — Unreal Engine 5, C++, Team Project

June 2025

- Developed the core echolocation mechanic and created the base pawn class that generates sound-based echoes in darkness.
- Implemented key parts of the player controller, optimized performance, and contributed to UI design and the options menu.
- Supported teammates by debugging Blueprints, guiding Perforce integration, and maintaining overall project health.
- Prepared the final build (.exe) using Inno Setup and designed the itch.io page.
- Link: <https://kenanege.itch.io/echoes-of-stella>

Dark Descent — Unity, C#, Team Project

Feb 2025

- Implemented core movement, dash, health system and enemy AI logic.
- Built modular spell casting mechanics and UI health bar controls.
- Link: <https://kenanege.itch.io/dark-descent>

In A Bad Mewd — Unity, C#, Team Project

Nov 2024

- Created destructible object classes with real-time physics and material fracture.
- Scoring system prevented abuse via tag validation and tracked combo chains.
- Link: <https://kenanege.itch.io/in-a-bad-mewd-webgltest>

Lord Of The Horde — Unity, C#, Solo Project

Oct 2024

- Designed full game loop for wave survival gameplay with XP upgrades and AI variants.
- Implemented procedural map system, enemy spawner, UI, and persistent high score manager.
- Link: <https://github.com/KenanAegean/Lord-Of-The-Horde>

No Need For Speed — Unity, C#, Solo Project

Mar 2025

- Designed and implemented core systems for a networked multiplayer racing game using Unity's Netcode for GameObjects (NGO).
- Built race logic including countdowns, lap tracking, checkpoints, and player state sync across clients.
- Implemented car controller, multiplayer lobby, and game manager.
- Link: <https://github.com/KenanAegean/No-Need-For-Speed>

GamerLog — Django, Python, Graduation Project

Jun 2023

- Developed a user-focused game logging and recommendation web platform.
- Integrated ChatGPT API for conversational game suggestions. Used PostgreSQL + Bootstrap.
- Link: <https://kenanege.com/gamerlog.html>

Professional Experience

Orion Innovation Mar 2023 – Sep 2024
Software Engineer Istanbul, Türkiye

- Debugged and optimized Java-based enterprise services, reducing error rates and improving backend response time.
- Dockerized microservices and implemented CI/CD pipelines, enabling smoother testing and deployment.
- Built an internal NBA match prediction platform using Django, ML models, and PostgreSQL for rapid analytics.

Orion Innovation Aug 2022 – Oct 2022
Software Engineer Intern Istanbul, Türkiye

- Developed a full-stack environment reservation tool using Java Spring Boot and MySQL.
- Participated in Agile sprint reviews, gaining first-hand experience in collaborative software delivery.

BDH - NETAŞ Aug 2021 – Sep 2021
Software Engineer Intern Istanbul, Türkiye

- Completed Salesforce admin and dev fundamentals including Apex scripting, automation rules, and cloud deployment.

Biltek Design and Software A.Ş. Sep 2018 – Nov 2019
Software Engineer Intern Istanbul, Türkiye

- Designed front-end layouts and backend features for commercial websites using PHP and MySQL.
- Implemented user login sessions, auth security, and CMS features.

Education

Futuregames Academy Sep 2024 – Present
Game Programming Warsaw, Poland

University of Lodz Feb 2022 – Jul 2022
Erasmus - Computer Science Łódź, Poland

Doğuş University Sep 2019 – Jul 2023
Software Engineering (Minor) Istanbul, Türkiye

Doğuş University Sep 2018 – Jul 2023
Computer Engineering (Major) Istanbul, Türkiye

Leadership & Activities

English Club Spring 2020 – Fall 2022
President/Founder Doğuş University

- Founded club to enhance English speaking and presentation skills. Organized weekly themed discussions.

IEEE Computer Society Spring 2019 – Fall 2022
Board Member Doğuş University

- Planned technical events, software seminars, and university coding workshops.
